MALEKA SHELLTON

DATA ANALYST

Johannesburg, South Africa | 078 481 5907 | malekashellton@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Analyst completing a Postgraduate Diploma in Data Science at Wits, with hands-on experience in data cleaning, SQL analysis, statistical analysis and dashboard development. Proficient in Excel, Power BI, SQL, Python and R, with practical experience turning raw data into business insights through DAX KPIs, exploratory analysis, customer segmentation and regression analysis.

EDUCATION

POSTGRADUATE DIPLOMA IN DATA SCIENCE **02/2026 – PRESENT**
University of the Witwatersrand | Johannesburg

BACHELOR OF EDUCATION – Mathematics & Physical Sciences **02/2022 – 12/2025**
University of the Witwatersrand | Johannesburg

TECHNICAL SKILLS

Data Analysis: Python (Pandas, NumPy, Matplotlib), R, SQL, exploratory data analysis, statistical analysis
Data Cleaning & Preparation: Excel, Pandas, data validation, missing-value imputation, deduplication
Business Intelligence: Power BI, DAX, Excel, KPI dashboards, interactive filters
Statistics & Modelling: Regression, correlation analysis, RFM analysis, K-means clustering, Scikit-learn
Databases: SQL (aggregation, window functions)
Tools: Git, GitHub, Jupyter Notebooks

SELECTED DATA ANALYTICS PROJECTS

Superstore Sales Performance Dashboard – Power BI & Excel | GitHub
Excel | Power BI | DAX | Data Cleaning
Cleaned and standardised raw retail sales data in Excel, then built an interactive Power BI dashboard with DAX KPIs (total sales, profit, profit margin %, average order value) and region, category, segment and date filters to show which regions, categories and products drive sales and profit.

Healthcare Data Cleaning & SQL Analysis | GitHub
Python | Pandas | SQL | Window Functions
Cleaned a deliberately messy 1,000-record patient dataset (mixed date formats, text-encoded numbers, invalid emails and phone numbers, duplicates), then wrote eight SQL queries, including a window function, to profile patients by condition, blood pressure, medication and age group and to flag unmedicated high-risk patients.

TB Patient Retention Analysis – District Health Data | GitHub
Python | Statistics | Regression | EDA
Audited data quality against a WHO-based framework, then used correlation analysis and multiple linear regression on District Health Barometer 2024/25 data (52 districts, 8 explanatory variables) to identify factors associated with TB patients lost to follow-up.

Customer Segmentation using R – RFM & K-means | GitHub
R | RFM Analysis | K-means Clustering
Segmented online retail customers by Recency, Frequency and Monetary value using K-means clustering into four groups (inactive, occasional, regular and high-value) to identify the customers most important to the business.

CERTIFICATIONS

Cisco Data Analytics Essentials | Microsoft Certified: Azure Fundamentals (AZ-900) | BCG X Data Science Job Simulation | AWS Educate Machine Learning Foundations

LEADERSHIP & EXPERIENCE

Residence Maintenance Officer | University of the Witwatersrand **02/2026 – PRESENT**
Coordinate resident maintenance reporting, unresolved-issue follow-up and operational communication between residents and management.

First Year Experience Mentor | University of the Witwatersrand DLU **02/2023 – 11/2023**
Guided first-year students through academic transition and communicated support information to diverse audiences.

AWARDS & LANGUAGES

Golden Key Southern Africa Award (2023) | Languages: Tshivenda, IsiZulu, English
